

Ceramic tile trim

Ceramic tile trim, ceramic tile trims, metal ceramic tile trim

Ceramic tile trim function

Ceramic tile trim were developed as a handsome edging profile for the corners of tile or stone decorated walls. They are smoothly rounded and available in a variety of materials. Aside from their protective function, they can also be used for attractive decoration design purposes. They are also suitable for use as a covering as skirting for tiled or carpet, parquet or natural stone floors. They give a good solution to the wall corner decoration, provide aesthetic improvement. High-quality formed pieces are available for joining profile sections together.
